

FP CGIL

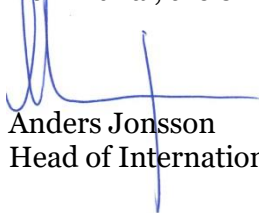

In support of your demonstration on 24 June 2023

We fully support your demands regarding public health and social care, which you are taking to the streets of Rome on Saturday.

Protection of National Health Service is crucial to guarantee care for everyone. It is of great importance to stop precarious employment and work conditions. Adequate staff is called for – and with proper wages.

The vital work that health and care workers perform every day all year around must be valued much higher. Good working environment is essential, and the health and safety must be protected in every workplace.

In solidarity,
Kommunal, the Swedish Municipal Workers' Union

Anders Jonsson
Head of International Relations
